Enterprise-grade VoIP and video systems providing flexibility and modularity, with no per user license fees!

Xorcom offers a full range of hybrid (PSTN + VoIP) telephony solutions for SMB and Enterprise, including:

Astribank USB Channel Banks: Modular and Flexible Telephony Interfaces

Astribank connects to the Asterisk® IP-PBX server via USB 2.0, thus eliminating the need for an intermediating PCI card.

VoIP + PSTN PBX for SMB and Enterprise

XR Series: IP-PBX

These reliable and cost-effective VoIP and PSTN telephony solutions are available in three product families to suit up to 30, 200 and 1000 users, respectively.

XE Series: Enhanced IP-PBX

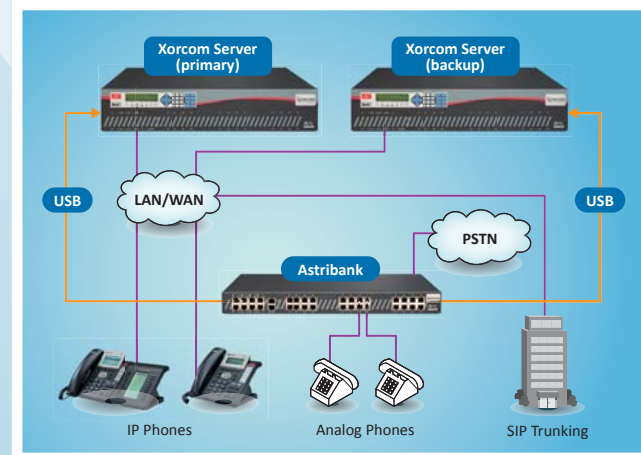

For businesses whose call volumes are higher than 40%, and/or are running additional applications which mandate a more powerful phone system, and/or have stricter policies about networking and reliability, the XE series is the right choice.

CompletePBX: Commercially-supported Open PBX for Total Local Control

CompletePBX software bundled with Xorcom IP-PBX increases an organization's efficiency, productivity, and profits by streamlining PBX administrative tasks, including live switchboard and reporting.

TwinStar: Automated Server Redundancy for Maximum Uptime

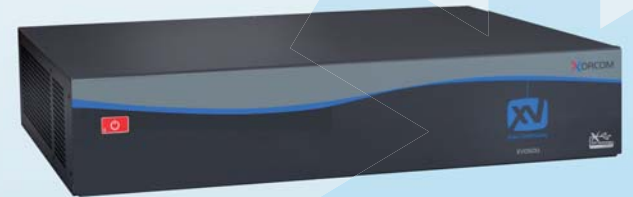

This award-winning high availability solution provides automatic detection of server failure and immediate switching of all telephony functions, including telephony interfaces, to a back-up server.

XV Series: High Definition Multi-point Video Conferencing

The XV3000 is a bundled video conferencing and IP-PBX solution; interoperable with standard SIP endpoints.

The XV0500 is a stand-alone video conferencing solution for existing IP-PBX; interoperable with standard SIP endpoints.

Standard-based SIP protocol in these Xorcom video conferencing solutions enables connection to a wide variety of devices: IP video phones, laptops, smartphones and room systems
