Enterprise-grade VoIP phone systems providing flexibility, modularity, and no per user license fees

IP communications enable educational institutions to lower costs, integrate new technology, and provide innovative services to staff and students. Campuses are dynamic environments characterized by frequent office reallocation, a telephone network distributed over multiple buildings, and tightly controlled budgets. CompletePBX for Campuses by Xorcom provides an IP communications solution that combines innovative voice applications with rich IP PBX capabilities in an open, standards-based architecture. Deploying CompletePBX can complement or replace existing telecom equipment and services and streamline operations.

Ease of Use and Cost Reduction

Unlike proprietary systems, CompletePBX for Campuses overcomes the need for layers of support and per extension license fees for maintenance equipment costs. CompletePBX simplifies communications management and reduces costs by converging voice and data over a single channel.

CompletePBX for Campuses provides numerous features including:

- Customized inbound call routing for fast and efficient call processing
- Complete integration with any current analog infrastructure
- Cell phone and smart phone integration
- Interconnection of various offices to provide seamless desk-to-desk dialing
- Extensive call reporting
- Call monitoring and recording
- Voicemail and Fax to email (unified messaging)
- Integrated call accounting software
- Redundancy through Xorcom's TwinStar™ hot failover capability to maximize business continuity
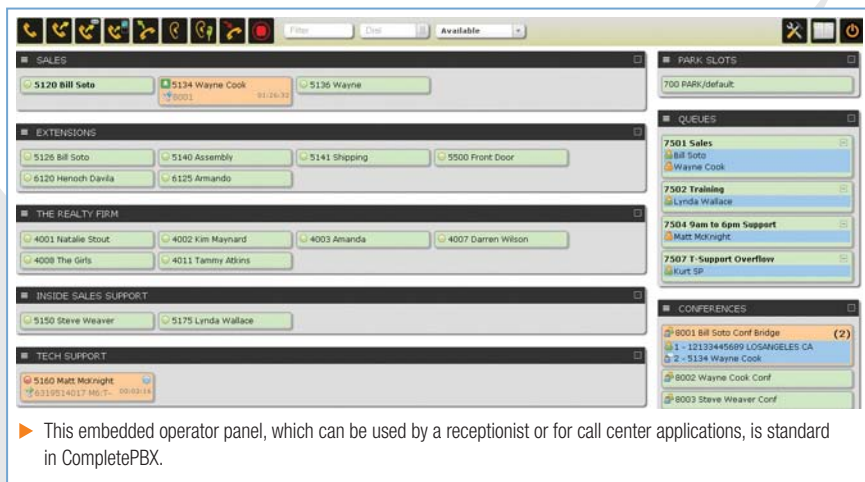

Xorcom CompletePBX Software

Increase your organization's efficiency, productivity, and profits.

CompletePBX means seamless integration

- Reduce upgrade costs by using existing IP telephones or SIP (Session Initiation Protocol) clients.
- Easily integrate third party products via the open application programmable interface.

CompletePBX is based on open source software

- The only commercially-supported open PBX that provides root access to certified dealers and end users for total local control of the telephony system.

▶ This embedded operator panel, which can be used by a receptionist or for call center applications, is standard in CompletePBX.

- Xorcom has stabilized the software and upgrade process and is the sole source for support, maintenance, and upgrades.
- An embedded operator panel, which can be used by a receptionist or for call center applications, is standard.
- Enhanced CDR (Call Detailed Records) and call center reporting software is available at a flat rate.

CompletePBX supports the TwinStar hot failover solution

- Xorcom's TwinStar is the world's most cost-effective full redundancy solution for IP PBXs, ensuring maximum business continuity.

All CompletePBX systems come with a wide array of standard features including:

- Unlimited Extensions, Voicemail Boxes, Hunt Groups, Call Center Groups, and Auto Attendants/IVRs
- Voicemail and Fax-to-email
- Call Recording
- Call Barge and Whisper
- Find Me/Follow Me
- Free Softphone Integration
- Free Smart Phone Integration

Xorcom CompletePBX is a reliable, flexible, cost-effective communications solution that provides a customized user experience for each role in the organization.

Xorcom CompletePBX is distributed only through the Xorcom Certified Dealer channel by partners who are experienced in IP telephony implementations and who have completed the Xorcom certified training course.

▶ This is the CompletePBX launch pad, which provides easy, password-protected access to all system modules.
